

DWFritz Expands Manufacturing Facilities

The new building continues the company's strategic investments in its core capabilities to support growing market demands

WILSONVILLE, Oregon, July 6, 2022 – DWFritz Automation, a leading provider of custom, high-precision automation solutions for advanced manufacturing, today announced the leasing of a new manufacturing facility in Sherwood, Oregon.

Located at 21150 SW Cipole Pl., the new 80,000-square-foot manufacturing facility is at the heart of the Trammell Crow Corporate Park. The building's state-of-the-art facilities features 40' ceilings and 50' spans between columns, providing ample manufacturing space for our engineer-to-order and build-to-print business segments to continue delivering the future of advanced manufacturing at an accelerated pace.

"Demand for automation in advanced manufacturing continues to grow and we are making long-term investments in our ability to grow with it," said Mike Fritz, CEO of DWFritz Automation. "This new facility represents a significant growth opportunity for us, expanding our capabilities and throughput capacity. Our clients rely on our systems to maximize their yields and reduce their manufacturing costs. This new space, designed specifically to increase our operational efficiency, will enable our team to collaborate in new ways so we can continue developing brilliant solutions for our clients."

"We are thrilled that DWFritz has selected Sherwood, Oregon for their major expansion," said Sherwood Mayor Keith Mays. "Sherwood is focused on encouraging the continued growth of innovative, high-precision advanced manufacturing companies in our community. DWFritz is precisely the type of world-class manufacturing company we seek to attract to Sherwood as we continue to develop 2 million square feet of new industrial and manufacturing space in Sherwood over the next few years. The DWFritz expansion will create new high-quality jobs and significant new economic impacts for our residents. As Mayor, I welcome DWFritz to Sherwood and offer our congratulations to the DWFritz team and to all our private sector and public sector partners who made this possible."

In addition to the corporate headquarters in Wilsonville, Oregon, manufacturing facilities in China, and offices in France, the Sherwood facility will extend DWFritz's manufacturing capacity and support the company's overall growth strategy. And the new building's LEED certification continues DWFritz's ongoing commitment to

sustainability. With this addition, the company will now have more than 250,000 square feet of production space worldwide.

About DWFritz Automation

DWFritz Automation, based in Wilsonville, Oregon, USA, is a leading global provider of high-precision automation solutions for advanced, high-volume manufacturing. The company designs, builds, and supports engineer-to-order automation systems and high-speed, non-contact metrology products, as well as providing world-class build-to-print manufacturing capabilities to clients.
