

DWFRITZ

THE PRECISION AUTOMATION EXPERTS®

IN THE BEGINNING

In 1973, the company was started as a one-man consultancy grounded in engineering excellence. With a hollow-core door and two sawhorses as a desk, Dennis Fritz dedicated himself to brilliant solutions and exceeding client expectations. Dennis' belief in honesty, integrity, continuous improvement, collaboration, and "wowing" clients, evolved into five strong core values which have remained the foundation of the company for over four decades.

1973

Founded as Dennis W. Fritz, PE Consulting Engineer in the West Hills of Portland, OR. Business focused primarily on lumber industry.

1973

Completed first design/build project.

1983

Relocated to Lake Oswego, OR. Transitioned away from wood products, and landed major projects with Boeing and Intel.

1988

Completed first design/build project.

1989

Landed Hewlett Packard ink jet business and revenue exceeded \$1 million for the first time.

1992

Renamed to DWFritz Automation, Inc.

TODAY AND FORWARD

Our journey has taken us through multiple industries and technologies. The company is now a world-class, global business with broad expertise in custom precision automation. We have tripled in size in only the past two years. Coupling our company foundation with automation leadership in "microns & milliseconds," we are well-positioned to meet the high demands of advanced manufacturing.

2010

Landed major new strategic account and opened up DWFritz China in Shanghai.

1998

Relocated to 20,000 square foot facility in Durham, OR and established precision automation focus.

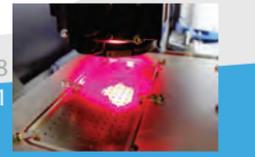

2012

Relocated to 60,000 square foot facility in Tualatin, OR. Annual revenue exceeds \$25 million.

2013

Relocated to 70,000 square foot Wilsonville headquarters.

2015

Partnered with two new large Fortune 500 medical device companies and shipped volume deployments of precision automation systems.

2016

Inaugurated second 35,000 square foot facility in Wilsonville.

2017

Partnered with Clean Energy Manufacturer to produce stationary energy storage modules. Annual revenue exceeds \$125 million.

2018

Relocated to 165,000 square foot facility in Wilsonville, OR. 100,000 square feet of dedicated manufacturing space to support Smart Factories of the Future.
